# Pelican Network
Single Sign On (SSO) Requirements

Broker partners will need a login/authentication process that is in line with the OpenID Connect Standard. The broker can either build their own version OR use 3rd party providers such as Auth0. Once completed the broker will need to provide Pelican with the following credentials:

▼ Authorization code flow + PKCE

▼ Scopes: openid, email, profile

▼ token_endpoint_auth_methods_supported must include: client_secret_post

▼ Redirect URL: https://identity.copy-trade.io/signin-oidc-[brokerWL]

▼ Incorporate openId address claim to allow country_code to be passed into Pelican from external identity providers

▼ Post logout URL: https://identity.copy-trade.io/signout-[brokerWL]

● Authority set to secure token URL
